Department of Biological Sciences Inga Richter Fall 2023 Seminar Series

In memory of a former doctoral student Inga R. Richter. Inga was dedicated to her students and profession. She felt that her teaching responsibilities did not stop in the classroom; they stopped when her students understood. Seminars are held on Mondays in Room 926 North (69 th

Street between Park and Lexington) at 12:30PM or via Zoom.

Click here for pdf of series.

Click on the speaker for seminar flyer when available

# **Monday Sept 11**

Understanding splicing and isoform regulation across cell types, brain regions, postnatal development and species

Dr. Hagen Tilgner

Center for Neurogenetics Brain and Mind Research Institute, WCMC

Host: Carmen Melendez-Vasquez

## Monday Sept. 18

The effects of locus coeruleus stimulation in health and disease: from enhancing sensory processing to reducing amyloid plaques

Dr. Qi Wang

Biomedical Engineering-Columbia Univ.

Host: Maria Pereira

## Monday Oct. 2

A transposase-derived gene required for human brain development

Dr. Luz Jubierre

MSKCC

Host: Hualin Zhong

## Tuesday Oct. 10\*

Immunization with a Trypanosoma cruzi cyclophilin-19 deletion mutant protects against acute Chagas disease in mice

Dr. Bijay Jha

Department of Health Professions, York College

Host: Jayne Raper

#### Monday Oct. 16

Beta catenin determines blood brain barrier permeability in cerebral malaria

<u>Dr. Julio Gallego-Delgado</u> Lehman College, CUNY

Host: Jayne Raper

#### Monday Oct. 23

Single-cell RNA-Seq provides new insights on immune evasion of the malaria parasite Plasmodium falciparum

Dr. Francesca Florini

Weill Cornell

Host: Jayne Raper

Monday Oct. 30 (Zoom)

Clinical Alzheimer's Disease: Diagnosis, Management and Cases

Dr. Anna Starikovsky Nordvig

Weill Cornell

Host: Maria Pereira

Monday Nov. 6

Visualizing meiotic DNA double-strand break machinery, one molecule at a time

Dr. Kaixian Liu

MSKCC

Host: Hualin Zhong

Monday Nov. 13

A Lethal Recipe: How Location, Mutation, and Chromatin Collude to Sustain Metastatic Tumors

Dr. Kaloyan Tsanov

MSKCC

Host: Hualin Zhong

Monday Nov. 20

Cup is essential for oskar mRNA translational repression during early Drosophila oogenesis

Dr. Livia Bayer

Hunter

Host: Diana Bratu

Monday Nov. 27

How B cell tumors use embryonic "superpowers" to outcompete healthy immune cells

Dr. Coraline Mlynarczyk

Weill Cornell

Host: Hualin Zhong

Monday Dec. 4

**Mechanisms of Oncogenic Translation in Cancer** 

Dr. Kamini Singh

Albert Einstein College of Medicine

Host: Andy Wolfe

Monday Dec. 11

Launching the next generation: Nuclear and cytoplasmic reprogramming during germ cell to maternal transition

Dr. Prashanth Rangan

Black Family Stem Cell Institute

Host: Diana Bratu
